

# INSTRUCTIONS FOR USING SPR SOFTWARE THROUGH REMOTE DESKTOP CONNECTION (WINDOWS 7)

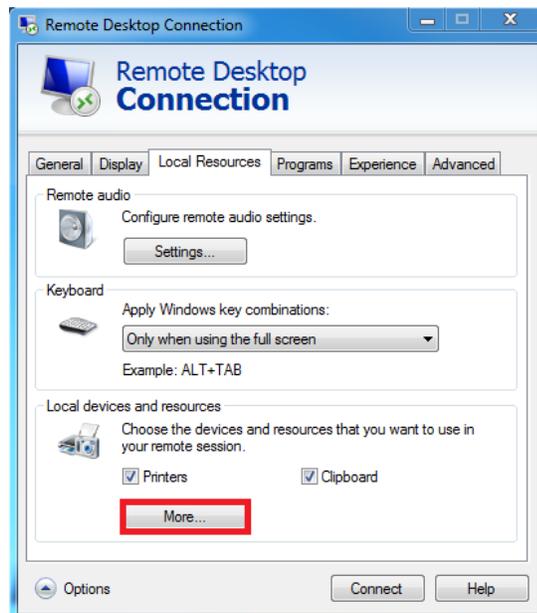

- 1) Go to Start -> All Programs -> Accessories and click on Remote Desktop Connection.

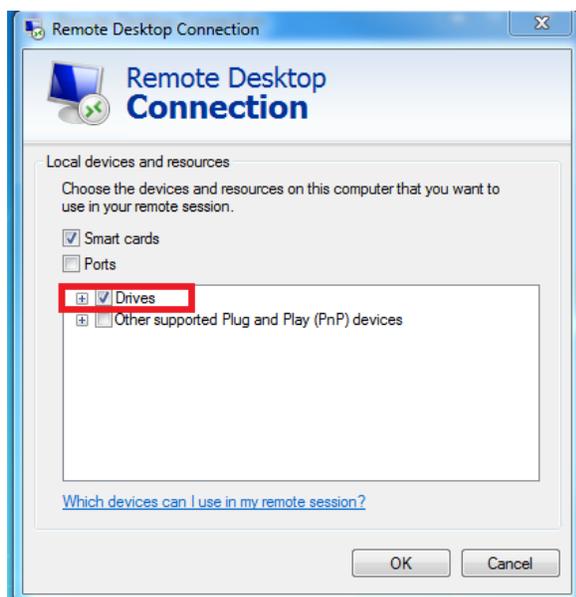

- Enter "spr.rrc.uic.edu" in computer text field.
  - Click on Options.
- 2) Specify your UIC Net ID as **AD\NetID** in the Username text field as Specified below.

- 3) Click on **Local Resources** as specified in the screenshot above and Click on **More**.

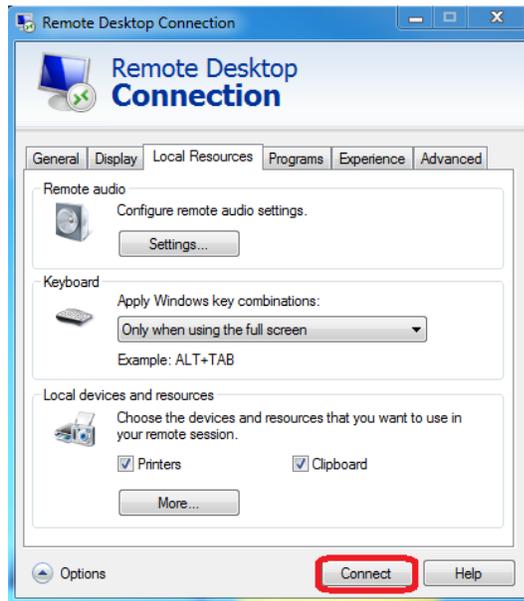

- 4) Then please check the *Drives* option and then click OK. This will enable your local drives in the remotely login machine and you can easily copy the files from your local drives into remote machine and analyze them.

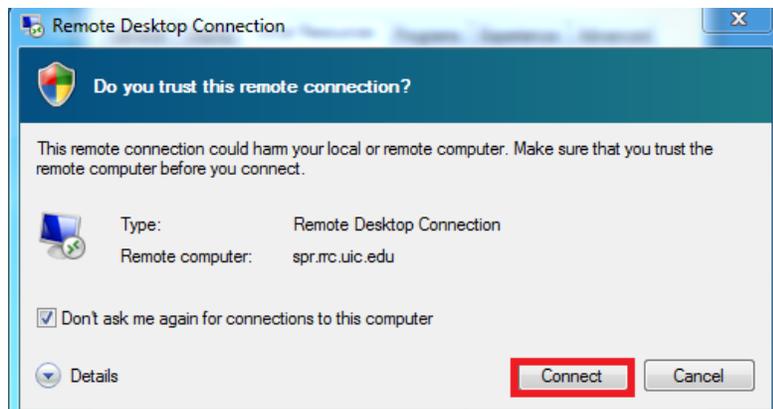

(\* You can also check other supported plug and play, in case you use flash drives or external drives, Windows remembers the selection).

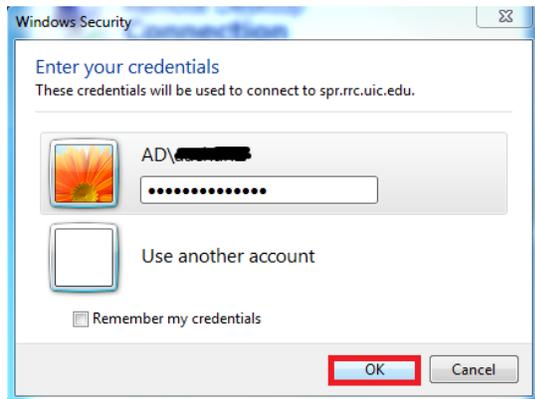

5) Click on Connect.

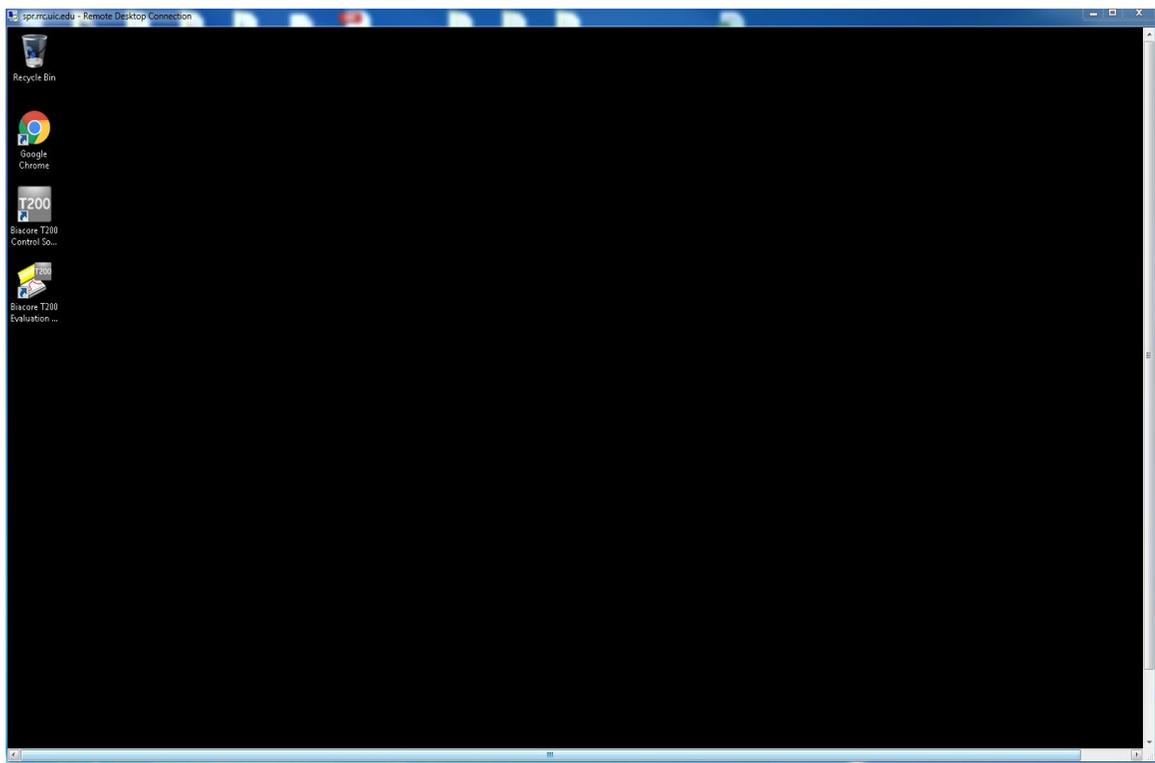

6) Check the Don't Ask me Again box and click on connect.

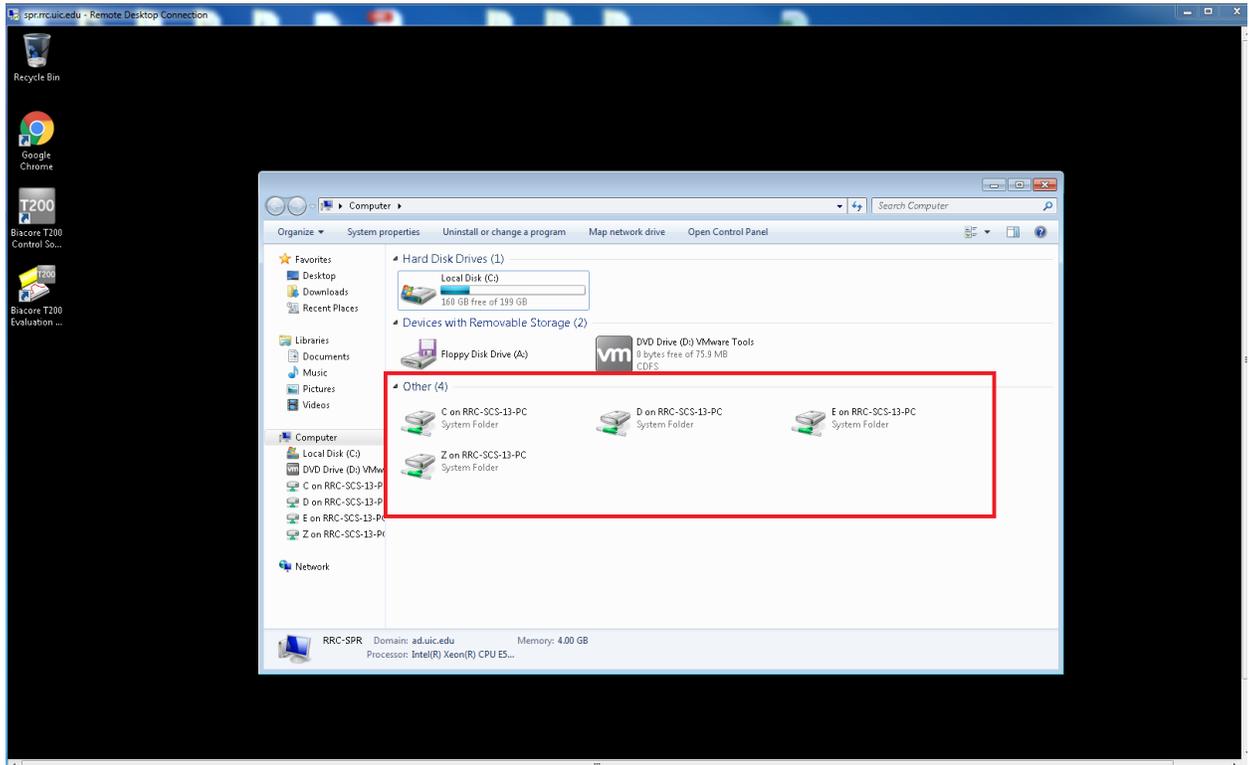

7) Enter your UIC ACCC credentials and click on OK.

8) You will now be connected to your account on the remote SPR computer.

9) You can access your local drives on the remote computer, by going to My Computer on the remote desktop

10) Once you are finished using the SPR software on the remote machine, please **Log Off** from your account.
